

Hello, My name is Rushikesh Khandekar, I'm working as a QA for the last 1.5 years in TCS.

As a QA, I have worked on Manual Testing for 1 year, and for the last 6 months, I was working on automation testing.

I have experience in Telecom and Investment banking domain projects.

As a part of the testing team, I am responsible for understanding user stories, test case preparation, test case execution, reporting defects.

I have experience in sanity testing, functional testing, regression testing, retesting, database testing, API testing.

For the last 6 months, I was working on automation testing. In Automation testing, I am currently using Selenium WebDriver with Java, Maven, and TestNG framework.

I am also having knowledge of Oracle, Unix commands, and Jira as we have used Jira for project management and bug tracking purpose.

I am well aware of the Agile Scrum framework and have also attended ceremonies of agile such as Sprint Planning Meeting, review meeting, and retrospective meeting.

Thank You.

Hello,

I am Akash Rajendra Avhad currently I am working in Company from last 2 years as software test engineer .In last two years as QA I have worked on MANUAL TESTING AND AUTOMATION TESTING.

In a MANUAL TESTING I did sanity testing , system and functional testing ,for a backend coverage I am well aware about SQL.

In AUTOMATION TESTING I am using selenium as automation tool and I am working with test NG data driven frame work. With basic java knowledge

Also having a knowledge about jira tool for project management and most importantly bug tracking purpose .

I am aware about unix commands also.

In my last organization I am working in agile scrum framework .so, I was a part of all ceremonies like standup calls, sprint planning meeting , sprint review meeting , sprint retrospective meeting.

In this two years I was a part of some projects i.e. TELECOM DOMAIN AND BANKING DOMAIN

That's all about me .

THANK YOU...

Hello,

I am Shrikant Dhere

I have been working as QA Test Engineer from last 3.2 years in Cognizant . As a QA, I have worked on Manual Testing for 2.5 years and for last 8 months, I am working on automation testing. In manual testing, I was responsible for test case preparation, sanity testing, system and functional testing and retesting. I have performed behavioral coverage testing, back end coverage testing, etc.

And currently my responsibilities are preparing automation scripts in Selenium webdriver, preparing effective test cases, executing test cases, defect reporting in jira tool, Executing framework and analysis results.

I am well aware about Agile scrum framework and have also attended ceremonies of agile such as Sprint Planning Meeting, review meeting and retrospective meeting.

In these 3.2 years of experience, I have been part of two projects i.e. telecom domain and banking domain. While working on telecom domain project I learned Unix. I have knowledge of Oracle Database and Java Programming Language as well.

Thank you!
